A strong sense of tradition emerges in China during a period that looks with nostalgia to the past as an antidote to ongoing political and social disruption. While several versions of that past compete in the writings of the late Zhou masters, the early Zhou period and the "sage" Confucius eventually become central parts of what we might label "the dominant past."

Eastern Han Chinese or Later Han Chinese is the stage of the Chinese language revealed by poetry and glosses from the Eastern Han period (first two centuries AD). It is considered an intermediate stage between Old Chinese and the Middle Chinese of the 7th-century Qieyun dictionary.

The resurgence of modern China has generated much interest, not only in the country's present day activities, but also in its long history. As the only uninterrupted ancient civilization still alive today, the study of China's past promises to offer invaluable insights into understanding contemporary China. Providing coverage of the entire Imperial Era (221 BCE-1912 CE), this handbook takes a chronological approach. It includes comprehensive analysis of all major periods, from the powerful Han empire which rivalled Rome, and the crucial transformative period of the Five Dynasties, to the prosperous Ming era and the later dominance of the non-Han peoples. With contributions from a team of international authors, key themes include: Political events and leadership Religion and philosophy Cultural and literary achievements Legal, economic, and military institutions This book transcends the traditional boundaries of historiography, giving special attention to the role of archaeology. As such, the Routledge Handbook of Imperial Chinese History is an indispensable reference

work for students and scholars of Chinese, Asian, and World History.

This publication is the long-awaited complement to Michael Loewe's acclaimed Biographical Dictionary of the Qin, Former Han and Xin Periods (2000). With more than 8,000 entries, based upon historical records and surviving inscriptions, the comprehensive Biographical Dictionary of Later Han to the Three Kingdoms (23-220 AD) now provides information on men and women of the Chinese world who lived at the time of Later (or Eastern) Han, from Liu Xiu, founding Emperor Guangwu (reg. 24-57), to the celebrated warlord Cao Cao (155-220) at the end of the dynasty. The entries, including surnames, personal names, styles and dates, are accompanied by maps, genealogical tables and indexes, with lists of books and special accounts of women. These features, together with the convenient surveys of the history and the administrative structure of the dynasty, will make Rafe de Crespigny's work an indispensable tool for any further serious study of a significant but comparatively neglected period of imperial China.

The book was written by the past Historian, Professor Xiong Deshan. It explained the origin and development of China civilization from the point of view of economy and society by making full use of archaeology materials and deep analysis of the long and slow

development of Chinese society. For the researchers on China history and social history, it could be an important reference. Published by SCPG Publishing Corporation and distributed by World Scientific for all markets except China

This book breaks with convention and provides an overview of Chinese history in the form of special topics. These topics include the major issues of "A Scientific Approach to the Origins of Chinese Civilization," "Ancient Chinese Society and the Change of Dynasties," "The Golden Ages of the Han, Tang and Qing Dynasties: a Comparative Analysis," "Transportation Systems and Cultural Communication in Ancient China," "Ethnic Relations in Chinese History," "The Systems of Politics, Law and Selecting Officials in Ancient China," "Agriculture, Handicraft and Commerce in Ancient China," "The Military Thought and Military Systems of Ancient China," "The Rich and Colorful Social Life in Ancient China," "The Evolution of Ancient Chinese Thought," "The Treasure House of Ancient Chinese Literature and Art," "The Emergence and Progress of Ancient Chinese Historiography," "Reflection on Ancient Chinese Science and Technology," "New Issues in the Modern History of China," and "A General Progression to the Socialist Modernization of the People's Republic of China." The book is based on current literature and research by university

students. The modern history section is relatively concise, while the topics related to ancient Chinese history are longer, reflecting the country's rich history and corresponding wealth of materials. There is also an in-depth discussion on the socialist modernization of the People's Republic of China. The book provides insights into Chinese history, allowing readers "to see the value of civilization through history; to see the preciseness of history through civilization." It focuses on the social background, lifestyle and development processes to illustrate ideologies and ideas.

This handbook provides a comprehensive analysis of the dynamics and prospects of democratization in East Asia. A team of leading experts in the field offers discussion at both the country and regional level, including analysis of democratic attitudes and movements in China, Japan, South Korea, and Taiwan. Evaluating all the key components of regime evolution, from citizen politics to democratic institutions, the sections covered include: • Regional Trends and Country Overviews • Institutions, Elections, and Political Parties • Democratic Citizenship • Democratic Governance • The Political Economy of Democratization Examining the challenges that East Asian emerging democracies still face today, as well as the prospects of the region's authoritarian regimes, the Routledge Handbook

of Democratization in East Asia will be useful for students and scholars of East Asian Politics, Comparative Politics, and Asian Studies.

Discover the remarkable history of the Eastern Han Dynasty... If the history of the Eastern Han dynasty were limited to the accomplishments of its scholars, scientists, and inventors, it would be a glorious saga of the innovation and creativity of the human mind. Anesthesia was first used during surgical procedures in the years of the Eastern Han emperors, earthquake tremors were measured, and perhaps, most remarkable of all, a process for manufacturing paper was developed by a eunuch of the imperial court. But the imperial court of the Eastern Han is also an account of the abuse of power, the murder of children unfortunate enough to be placed upon the Dragon Throne, the heedless, reckless incompetence of emperors, the malignant ambition of scheming empress dowagers, and the rebellions that arose as ordinary people struggled. The accomplished governing of Emperors Guangwu, Ming, and Zhang established a central authority that expanded China's might and stability. Their less-capable successors-a number of them merely children when they became emperor-left the Chinese people deprived of those benefits which competent government provides. When the last Eastern Han emperor was forced to abdicate, China, no longer united as a single

empire, was split into three different regions, each ruled by an ambitious warlord. During the last two centuries BCE, the Western Han capital of Chang'an, near today's Xi'an in northwest China, outshone Augustan Rome in several ways while administering comparable numbers of imperial subjects and equally vast territories. At its grandest, during the last fifty years or so before the collapse of the dynasty in 9 CE, Changan boasted imperial libraries with thousands of documents on bamboo and silk in a city nearly three times the size of Rome and nearly four times larger than Alexandria. Many reforms instituted in this capital in late Western Han substantially shaped not only the institutions of the Eastern Han (25-220 CE) but also the rest of imperial China until 1911. Although thousands of studies document imperial Rome's glory, until now no book-length work in a Western language has been devoted to Han Changan, the reign of Emperor Chengdi (whose accomplishments rival those of Augustus and Hadrian), or the city's

impressive library project (26-6 BCE), which ultimately produced the first state-sponsored versions of many of the classics and masterworks that we hold in our hands today. Changan 26 BCE addresses this deficiency, using as a focal point the reign of Emperor Chengdi (r. 337 bce), specifically the year in which the imperial library project began. This in-depth survey by some of the worlds best scholars, Chinese and Western, explores the built environment, sociopolitical transformations, and leading figures of Changan, making a strong case for the revision of historical assumptions about the two Han dynasties. A multidisciplinary volume representing a wealth of scholarly perspectives, the book draws on the established historical record and recent archaeological discoveries of thousands of tombs, building foundations, and remnants of walls and gates from Changan and its surrounding area.

Ancient China: A History surveys the East Asian Heartland Region - the geographical area that eventually became known as China - from the Neolithic period through the Bronze Age, to the early imperial era of Qin and Han, up to the threshold of the medieval period in the third century CE. For most of that long span of time there was no such place as "China"; the vast and varied territory of the Heartland Region was home to many diverse cultures that only slowly

coalesced, culturally, linguistically, and politically, to form the first recognizably Chinese empires. The field of Early China Studies is being revolutionized in our time by a wealth of archaeologically recovered texts and artefacts. Major and Cook draw on this exciting new evidence and a rich harvest of contemporary scholarship to present a leading-edge account of ancient China and its antecedents. With handy pedagogical features such as maps and illustrations, as well as an extensive list of recommendations for further reading, *Ancient China: A History* is an important resource for undergraduate and postgraduate courses on Chinese History, and those studying Chinese Culture and Society more generally.
