book is a firework display. It sets off scores of explosions which light up the sky over-arching our field, terrain that is normally traversed nose down and too mindful of the footsteps of our predecessors."—Burlington Magazine

A fading rodeo star returns to the family ranch—and finds the spark of love—in this western romance by the New York Times bestselling author. Professional rodeo cowboy “HW” Morgan achieved his dream of competing in the national rodeo finals—but his career came at a price. His twin brother wants nothing to do with him and a string of hookups haven’t warmed his bed. When he loses to a younger competitor, he knows it’s time get his head on straight—and the only place to do that is at home, if his family will have him. Army veteran Samantha Kelly isn’t sure that her visit to Morgan Ranch is a good idea. Struggling to rehab from an injury, she’s willing to give anything a try—even equine therapy. But it doesn’t help that her riding instructor is bold, brash, and distractingly easy on the eyes. As she and HW warily try to work each other out, slowly and surely an unbreakable trust is built—one on which dreams can be built. “If you love cowboys—and who doesn’t—you’ll love the Morgans!”—Cora Seton, New York Times bestselling author

This title contains the proceedings of the 2013 5th International Conference on Advanced Computer Control, held in Singapore. The topics covered include: Modern and advanced control strategies; human-machine systems; multimedia and communication systems; database systems; robotics and automation; and much more.

This overview of some of the main results and recent developments in nonlinear water waves presents fundamental aspects of the field and discusses several important topics of current research interest. It contains selected information about water-wave motion for which advanced mathematical study can be pursued, enabling readers to derive conclusions that explain observed phenomena to the greatest extent possible. The author discusses the underlying physical factors of such waves and explores the physical relevance of the mathematical results that are presented. The book is intended for mathematicians, physicists and engineers interested in the interplay between physical concepts and insights and the mathematical ideas and methods that are relevant to specific water-wave phenomena. The material is an expanded version of the author's lectures delivered at the NSF-CBMS Regional Research Conference in the Mathematical Sciences organized by the Mathematics Department of the University of Texas-Pan American in 2010.

A multidisciplinary, in-depth historical examination of development in Africa including interrelated

factors such as foreign trade, international relations, politics, and indigenous institutions.

This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

DHEA and the Brain reviews a range of existing studies regarding DHEA administration to animals and humans. Chapter authors evaluate DHEA metabolism in tissues and organs, explore DHEA effects in the liver that may be of importance to the brain, and discuss recent findings regarding how DHEA is made in the brain. New perspectives about the neuropro

This is a free romantic suspense book, the beginning of a romantic suspense series, although this book with this couple reads as a standalone. Twenty-six year old Jen Mansko finds out the hard way that she's too trusting. Her apartment ransacked, her bank account emptied, and her heart broken, Jen has had enough and high-tails it to the only place she can think of where she will be welcomed - her brother's house. Anxious for a fresh start, Jen does something completely out of character and decides to become a cop. Soon, the athletic beauty with the striking-pink locks captures the attention of Sergeant Hunter Foley. When she is vetted for an undercover assignment, Jen dares another feat and quickly wins the approval of the powers that be. Once embedded in the covert operation, yet another unlikely suitor is drawn to her. With two men on opposite sides of the law vying for her attention, Jen is forced to make a choice or risk having all she's worked so hard for ripped away from her. This is a spin-off of the Edge of the Heat Series. The characters from the Edge of the Heat will weave lightly in and out of the Unauthorized series. This is a standalone novel, however, there is a cliffhanger at the end that involves the H/h of the next book. Heat level: moderate. suspense or thriller level: moderate. Some swearing. 18+ categories: romantic suspense, contemporary romance, police romance, strong female protagonist, thriller, romantic thriller, suspenseful romance

In the field of history, the Web and other technologies have become important tools in research and teaching of the past. Yet the use of these tools is limited—many historians and history educators have

resisted adopting them because they fail to see how digital tools supplement and even improve upon conventional tools (such as books). In *Pastplay*, a collection of essays by leading history and humanities researchers and teachers, editor Kevin Kee works to address these concerns head-on. How should we use technology? Playfully, Kee contends. Why? Because doing so helps us think about the past in new ways; through the act of creating technologies, our understanding of the past is re-imagined and developed. From the insights of numerous scholars and teachers, *Pastplay* argues that we should play with technology in history because doing so enables us to see the past in new ways by helping us understand how history is created; honoring the roots of research, teaching, and technology development; requiring us to model our thoughts; and then allowing us to build our own understanding.

Paulie and Stoner aren't bad seeds; they're just a little too smart for their own good. They stole their first car in kindergarten, and as for the homemade rocket launcher in Stoner's garage . . . well, it's best just not to ask. With 9th grade just around the corner, Paulie and Stoner find themselves on the wrong side of some real bad kids, an older band of white supremacists that go by the name of "Twisted Cross." When a rumble at a high school keg party turns fatal, it sets off a chain of events that test the limits of Paulie and Stoner's friendship, and their very sanity. Welcome to Chapel Harbor, a town where everybody buries their secrets deep, and nobody is quite who they seem. A town where the ghost of a serial killer known as The Junkman is rumored to stalk the woods at night, and where an unassuming magic shop and its mysterious proprietor, Arthur Cardiff, may possess the key to an ancient and terrible evil. Packed with hairpin turns and twists that will keep you guessing until the very last page, *Infernal Machines* is a blood drenched, adrenaline fueled, roller-coaster of a horror story that's at once a paean to the Pulp Horror classics of the early 80's and a meditation on the enduring power of friendship.
