What Is Beta? Beta is a measure of the volatility — or systematic risk — of a security or portfolio compared to the market as a whole. Beta is used in the capital asset pricing model (CAPM), which...

Beta Definition - Investopedia
Beta is a measure of a stock's volatility in relation to the overall market. By definition, the market, such as the S&P 500 Index, has a beta of 1.0, and individual stocks are ranked according to...

What Beta Means When Considering a Stock's Risk
Why Does Beta Matter? Beta can help investors choose investments that match their specific risk preferences. A risk-averse investor, for example, may want to avoid overweighting their portfolio with high-beta stocks to avoid excessive volatility. Individual stock betas are extremely important when putting together a portfolio of assets. A diversified portfolio consisting of assets with different betas lowers the overall risk of the portfolio.

Beta Definition & Example | InvestingAnswers
Beta coefficient (β) = Covariance (R_e, R_m) / Variance (R_m) where: R_e = the return on an individual stock R_m = the return on the overall market Covariance = how changes in a stock ' s ...

How does Beta reflect systematic risk? - Investopedia
A stock that swings more than the market over time has a beta greater than 1.0. If a stock moves less than the market, the stock's beta is less than 1.0. High-beta stocks tend to be riskier but...

The Formula for Calculating Beta - Investopedia
In finance, the beta (β or market beta or beta coefficient) is a measure of how an individual asset moves (on average) when the overall stock market increases or decreases. Thus, beta is a useful measure of the contribution of an individual asset to the risk of the market portfolio when it is added in small quantity. Thus, beta is referred to as an asset's non-diversifiable risk, its systematic risk, market risk, or hedge ratio. Beta is not a measure of idiosyncratic risk.

Beta (finance) - Wikipedia
A beta of less than 1 means that the security is less volatile than the market, while a beta greater than 1 indicates that its price is more volatile than the market. If a stock's beta is 1.5, it...
