to their environments.

### **A New Beak Evolution Lab! - Science Friday**

Finding the Speed of Evolution in a Study of Bird Beaks. Birds are believed to have evolved diverse beak forms rapidly in the presence of new food opportunities, a process called adaptive radiation.

### **Finding the Speed of Evolution in a Study of Bird Beaks ...**

Introduction: How are bird beaks adapted to the foods they eat? In this lab, we will simulate a scramble competition (kind of like in the old kids' game, "Hungry, hungry hippos") between six species of birds in six different environments. Each bird has a different beak type (spoonbill, tweezerbeak, tongbeak, etc.) and you will find that depending on the food available, some will do better than others in each environment.

### **Bird Beak Lab - Northern Arizona University**

Beaks of Finches This activity simulates concepts involved in natural selection: variation – different beak types and seed sizes competition – more than one bird feeding at a time struggle for survival – each bird trying to get enough to survive adaptation – particular characteristics of each beak environment – the birds, food and island
