Se tratan los materiales, métodos de trabajo, herramientas y equipos para el montaje seguro de grabados y dibujos para su visualización y almacenamiento.

Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw.* has been recognized as a seminal modern text on the conservation and restoration of works on paper. This volume, based on the authoritative revised German edition of 1950, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated scholarly edition. An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

Mounting and housing of works of art on paper have always had an important influence on both the survival and the appreciation of the work. Many dangers of a physical, biological and chemical nature await unprotected works of art on paper and specialist mounting provides the primary way of safeguarding them. Also, since the way in which works are presented to the public affects their perception of them, mounting of works of art can contribute significantly to the success or failure of an exhibition. A variety of problems, solutions, past practice and future developments in the mounting, storage and display of artworks on paper are considered in this volume of thirty-one articles presented at a conference at the British Museum*. These include the significance of mounting in the historical study of prints and drawings, the preventive care of paper artifacts, their aesthetic presentation and the management of paper collections. This volume (originally published in 2005) can be considered a companion volume to *Conservation Mounting for Prints and Drawings: A Manual Based on Current Practice at the British Museum* by Joanna M. Kosek (Archetype Publications 2004). Both volumes are essential tools for the owner, collector, curator, conservator and all professionals who deal with works of art on paper. *Conference entitled: *Mounting and Housing Art on Paper for Storage and Display: History, Science and Present-Day Practice*.

Provides over 1400 articles that deal with materials and techniques in art from ancient times to the present, including such media as ceramics, sculpture, metalwork, painting, works on paper, textiles, video, and computer art.

Step-by-step instructions and enlightening photos and diagrams thoroughly educate you on parchment and paper care; matting, hinging and framing; storage; basic conservation procedures; and other relevant topics.
