Darwin's Black Box: The Biochemical Challenge to Evolution. In 1996, Darwin's Black Box helped to launch the intelligent design movement: the argument that nature exhibits evidence of design, beyond Darwinian randomness. It sparked a national debate on evolution, which continues to intensify across the country.

Darwin ' s Black Box The Biochemical Challenge to Evolution Michael J. Behe. In Darwin ' s Black Box, Michael Behe argues that evidence of evolution ' s limits has been right under our noses, but its undoing is evident at such a small scale that we have only recently been able to see it. The field of biochemistry, begun when Watson and Crick discovered the double-helical shape of DNA, has unlocked the secrets of the cell.

Darwin's theory. Darwin's gradual evolution fails to explain biological systems that are irreducibly complex.

~~Darwin's Black Box: The Biochemical Challenge to Evolution~~

Originally published in Creation 19, no 2 (March 1997): 29-30. Darwin's Black Box: The Biochemical Challenge to Evolution by Michael J. Behe is a fascinating book which deals with the question of the origin of complex biochemical systems. The author, Associate Professor of Biochemistry at Lehigh University, Pennsylvania, begins with the premise that traditional evolutionary theory does not adequately explain the complexity of basic biochemical systems.

~~Michael Behe - Wikipedia~~

And that kind of intellectual dishonesty has no place in science. Darwin's Black Box just confirmed my suspicions. The argument that the irreducible complexity in biochemical systems couldn't possibly have happened at random in the time that the universe has existed is rather convincing, statistically speaking.
