Embodied Selves makes available some of the wide range of writing on identity in the growing area of mental science that emerged between 1830 and 1890. Our aim here is not to provide a comprehensive history of psychology as we now understand it as a discipline, but to bring together primary sources which give a sense of how some of the crucial questions about the shaping of social identity were discussed at this time.

Jenny Bourne Taylor and Sally Shuttleworth's invaluable Embodied Selves achieves something quite different from Hunter and Macalpine's seminal anthology Three Hundred Years of Psychiatry: 1535-1860 (1963). Taylor and Shuttleworth make clear their aim is not to provide a comprehensive history of psychology, but rather to illustrate through a range of carefully selected primary source extracts evolving and often conflicting ideas about social identity emerging from mental science between ...

Embodied Selves: An Anthology of Psychological Texts 1830 ...

This article examines the concept of the so-called embodied self. It attempts to answer the metaphysical question about the relation between body and self, the phenomenological question about the nature of our awareness of our own body, and the epistemological question of whether anything is special about the knowledge we have of our own bodies.
