GIS Tutorial for Health, fifth edition, teaches GIS and analysis skills to health professionals and students. Using health-care scenarios, the book demonstrates how to process and visualize health data to better manage services and support health-care policy. GIS Tutorial for Health includes lessons and exercises on mapping basics, including creating map layers, editing features, and using spatial data. The fifth edition is compatible with ArcGIS® 10.2 for Desktop. Exercise data is available for download. Instructor resources are available separately.

This study guide meets a growing demand for effective GIS training by combining ArcGIS tutorials and self-study exercises that start with the basics and progress to more difficult functionality. Presented in a step-by-step format, the book can be adapted to a reader's specific training needs, from a classroom of graduate students to individual study. Readers learn to use a range of GIS functionality from creating maps and collecting data to using geoprocessing tools and models for advanced analysis. The authors have incorporated three proven learning methods:

scripted exercises that use detailed step-by-step instructions and result graphics, Your Turn exercises that require users to perform tasks without step-by-step instructions, and exercise assignments that pose real-world problem scenarios. A fully functioning, 180-day trial version of ArcView 9.2 software, data for working through the tutorials, and Web-based teacher resources are also included.

Authoritative and comprehensive, this is the leading text and professional resource on using geographic information systems (GIS) to analyze and address public health problems. Basic GIS concepts and tools are explained, including ways to access and manage spatial databases. The book presents state-of-the-art methods for mapping and analyzing data on population, health events, risk factors, and health services, and for incorporating geographical knowledge into planning and policy. Numerous maps, diagrams, and real-world applications are featured. The companion Web page provides lab exercises with data that can be downloaded for individual or course use. New to This Edition \*Incorporates major technological advances, such as Internet-based mapping systems and the rise of data from cell phones and other GPS-enabled devices. \*Chapter on health disparities. \*Expanded coverage of public participation GIS. \*Companion Web page has all-new content. \*Goes beyond the United States to encompass an international focus.

GIS Tutorial for Health for ArcGIS Desktop 10.8 introduces readers to preparing, visualizing, and analyzing health data in a workbook designed for teaching with

ArcGIS Desktop 10.8.

Designed to benefit health management students and practitioners, this illustrated tutorial is an introduction to help students investigate patterns of uninsured and poor populations, prepare spatial data to analyze environmental hazards, analyze youth pedestrian injuries, and more. This edition is updated for ArcGIS 9.2.

GIS Tutorial 1 incorporates proven teaching methods into introductory exercises that help readers learn ArcGIS(R) for Desktop software skills.

From working with map layers to analyzing spatial data, GIS Tutorial for ArcGIS Desktop 10.8 helps users explore GIS concepts, apply ArcGIS software, and instill GIS skills.

Explains how to use ArcView, then uses ArcView as a base for teaching ArcEditor and ArcInfo to allow readers to learn tasks including mapmaking, spatial analysis, and managing geographic data.

In its third edition, GIS Tutorial for Health is fully-revised and updated for ArcGIS 9.3 software compatibility. To better support skill-building and development, this
