You can explore these forces with the Coulomb Force (Static) Gizmo\*. In its initial settings, the Gizmo shows two objects that each have a charge (q) of  $10.0 \times 10^{-4}$  C (coulombs). Turn on the Show force vector checkboxes for objects A and B. The arrows coming from each object are vectors that represent the electrostatic force.

Challenge: Coulomb's law is an equation that relates the electrostatic force between two objects to their distance and charge. In activity A, you found that the electrostatic force between two objects is proportional to the product of their masses. Combine that with what you have learned in this activity to complete Coulomb's law below.
