The Venturi flume HM162.51 is the fully-functional model of a Venturi channel measuring unit for flow rate measurement of a river course. The unit is designed for installation in the Modular Flow Channel HM162. The Venturi effect

Flow-measuring flumes are used to determine the discharge of a flume. Venturi flumes are specially shaped flumes with defined lateral contraction, sometimes also with a shaped bottom. The constriction dams up the discharge.
