Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.

In 1963, the first edition Legal and Regulatory Environment of Business, led by Bob Corley, started a new course emphasizing the legal environment in which business is conducted. By focusing on the public nature of how government regulates business activities, rather than simply how businesses privately make transactions, a movement away from traditional Business Law began. Through its previous 12 editions, Legal and Regulatory Environment of Business by Reed, Shedd, Morehead and Corley has been the leader in setting the standard for materials covered in an introduction to the legal and regulatory environment of business.
