Mathematical Statistics, Basic Ideas and Selected Topics ...  
1 Basic Ideas of Mathematical Statistics. Elementary statistical computations have been carried out for thousands of years. For example, the arithmetic mean from a number of measures or obser- vation data has been known for a very long time. First descriptive statistics arose starting with the collection of data, for exam- ple,atthenationalcensursorinregistersofmedicalcards,andfollowedbycom- pression of these data in the form of statistics or graphical representations (figures).

Volume I presents fundamental, classical statistical concepts at the doctorate level without using measure theory. It gives careful proofs of major results and explains how the theory sheds light on the properties of practical methods. Volume II covers a number of topics that are important in current measure theory and practice. It emphasizes nonparametric methods which can really only be ...
