This book teach you what Melanin is and how it functions in the body.

Who would have thought preparations for a March 2014 Sacred Libation Ceremony honoring one-hundred forty-eight African American women lynched in America would result in the observation melanin is worth more than gold? Dr. Frances Cress Welsing first told us the chemical melanin is produced through a process known as melanogenesis upon introduction of the chemical tyrosine to the enzyme tyrosinase. Melanin is found in such diverse places as bird feathers, animal fur, reptile scales, microorganisms, cephalopod ink, mushrooms and even fossils. Additionally, melanin is found in the hair, skin and eyes of people. Melanin is subjected to intense scientific scrutiny. Nevertheless, the highly educated people studying it had no idea melanin is worth more than gold. In June 2014 a post to the Keyamsha the Awakening blog openly declared melanin was worth \$353 a gram and \$300 a gram more than gold. Shortly afterwards, hoaxers began bombarding the blog with comments claiming "melanin thieves" were harvesting melanin from Black people. The hoax was easily falsified. The hoaxers made certain to never mention the company selling melanin extracted from the ink of sepia officinalis, the common cuttlefish. During the intervening years the melanin thieves hoaxers persisted in their efforts. In March 2017, the melanin thieves hoaxers launched a "Melanin Twitter bomb" involving the dollar value of melanin after publicity of black women and girls missing in Washington, D.C. was released. Their actions exposed a frailty in their psyche. They also reveal it is possible to wipe out false information involving melanin and take the melanin challenged inferiority complex (aka racism/white supremacy) along for the ride. It then became clear the time had come to enter the fray and dispel the myths about melanin. This book completely obliterates the false narrative of melanin. Perceiving facts from a melanin-centered perspective bestows upon us an expanded awareness of the world and our place in it. It helps provide the average person a means to immerse themselves in melaninology and emerge a "melaninologist." Essentially, we get to know ourselves. To date no other path for the public to independently verify, or falsify, outlandish claims regarding melanin being worth more than gold on their own without any "guru" to guide them have been made available. At this writing, melanin is worth over \$395 a gram more than gold. In ancient Kemet (misnomered Egypt) such words were known as hekau or words of power with the ability to heal. For nearly one-hundred years, since August 13, 1920, melanin put the "B" in R.B.G. and the "Black" in Red, Black and Green as the flag of Africans, at home and abroad.. Those are hekau, also. Our Blood, Our Melanin and Africa unites us. More hekau. The Afro, official currency of the United States of Africa, also known as the African Union, is worth \$2.22. We are swathed in hekau to such an extent Mchakato Wa Uponyaji (Swahili for the process of healing) has begun. All of which indicates we are living in a new era: the era when all the generations of man can be called blessed on a planet that works for everyone. This era demands we convene the Ubuntu Convention. That plebiscite sets the stage for drafting the Ubuntu Declaration. In emulating the success of the August 1920 Universal Negro Improvement Association convention, we deliberately create the world where we intend to live. The revival of the U.N.I.A. with 12 million dues-paying card-carrying members positions the organization to have a treasury flush with over \$400 million liquid. All of which represents a quantum shift in awareness, perception and power underway as you read this. Through our own actions we bring about the total, complete, and absolute Redemption of Africa for all time.

Asking the question, Are people with dark skin truly different?, these essays consider the history, science, and psychology of melanin. With contributions from such noted writers and scholars as Hunter Adams, Ann Brown, Richard King, and Owen Moore, these writings explore the history of people with surface skin melanin. The genetic influence of melanin on culture and learning is also addressed, with a specific look at the unfair treatment of African American children in schools that has led to poor IQ test scores and disproportionate numbers of African American children in special education classes.

"Contagiously upbeat, joyful, and positive . . . [C]herish this book." -Kirkus Reviews, STARRED REVIEW "A must-have for any library that is in need of books with positive representation for and about Black children, as there is no other alphabet book quite like this one." -School Library Journal, STARRED REVIEW "A necessary, uplifting volume that celebrates 'black girl magic' and 'black boy joy.'" -Publishers Weekly M Is for Melanin is an empowering alphabet book that teaches kids their ABCs and celebrates Black children, now available as a board book!
