This new edition of Tom Hutchinson's bestselling course combines all the aspects that students and teachers loved from the previous edition with exiting new digital components, extra resources and more teacher support than ever before Your students will love watching the new animated Mickey, Millie and Mut and Sweet Sue and Smart Alex cartoons. In later levels of the course the cartoons are replaced with dramatized episodes of Kids, the photo-story from the Student's Book. For your kinaesthetic learners there are new fun totalphysical response pronunciation activities in the pronunciation bank at the back of the Student's Book. Other students will enjoy reading the stories in the extensive reading bank And you will love all the teacher support available with Project fourth edition. Use digital resources more effectively in your lessons with the digital workshops that give you step by step guides to using some of the most educationally beneficial sites on the internet as well as ideas for how youcan use them with the projects in the Student's Book.

An innovative, five-level beginner's course for young learners from the age of 10.

Project brings English to life through motivating topics within a structured learning environment. It provides a clearly-structured, supportive framework of grammar with the flexibility to allow students to make their own discoveries. Language is presented in stimulating, realistic contexts. A high profile is given to skills development from the start of the course. Cross-curricular project work encourages students to communicate in English about their own lives and experiences. The strong cultural element helps students to establish a connection between language and life. Students are encouraged to learn about life in Britain and other English-speaking countries, as well as to explore differences and draw comparisons with their own cultures. Strong emphasis is placed on learner independence: students are encouraged to think about their own learning and reflect on their progress. The course is enriched by numerous songs, games, and puzzles which make language learning fun. The fifth level, Project Plus, is a revision level with the emphasis on skills extension, in particular reading and speaking.

This book was written as part of the Humanity Books: Creative Writers Program. A book kit was given to the child author of this book and he/she wrote and illustrated this story. Humanity Books partners with other organizations to provide creative arts projects for in-need children. All profits from book sales are given to the organization in order to directly benefit the child. The author of this story attends the Sunnyvale Neighborhood Center in Salt Lake City, Utah. The Refugee and Immigrant Center- Asian Association of Utah provides English classes, after-school programs, and provides walk-in and outreach services for the community at Sunnyvale Neighborhood Center.

A-State Department of Sustainability: Software Applications in Business Project A-State Department of Sustainability is a fictional organization in which the student works as the Executive Assistant. The project consists of 28 workdays (June 1 - July 8) during which students complete the following tasks: Create and update spreadsheets, databases, charts, graphs, an organizational chart and Gantt Chart; write business letters, memos, emails, a slogan, and press release; design a letterhead, brochure, advertisement, flyer, t-shirt, web site and blog; organize a global conference and conduct problem solving. Instructors may assign tutorials for software as needed. Tutorials are not included in the text. All assignments refer to "spreadsheet, database, word processing, ect." so the instructors/students can use their preferred software brands. Examples of how to format letters, memos, emails, and spreadsheets are included. In the optional research and presentation component students research and present topics related to global and domestic sustainability. This textbook has been designed for lower-level and upper-level courses and can be easily adapted for in-class or online use. From the author: I created this textbook while teaching Software Applications in Business because I could not find a suitable text. I have conducted many iterations of refinement during classroom use. Many years of industry experience together with a 15-year State University of New York tenure have enabled me to design a textbook that will meet the needs of instructors who wish to create a realistic experience which builds a skill set that students can confidently take into the workplace. Students have returned after graduation and told me this was a valuable class and they could immediately utilize the skills they developed during the class in their current jobs.
