Almost 100 years have passed since Trautz and Lewis put forward their collision theory of molecular processes. Today, knowledge of molecular collisions forms a key part of predicting and understanding chemical reactions. This book begins by setting out the classical and quantum theories of atom-atom

collisions. Experimentally observable aspects of the scattering processes; their relationship to reaction rate constants and the experimental methods used to determine them are described. The quantum mechanical theory of reactive scattering is presented and related to experimental observables. The role of lasers in the measurement and analysis of reactive molecular collisions is also discussed. Written with postgraduates and newcomers to the field in mind, mathematics is kept to a minimum, and readers are guided to appendices and further reading to gain a deeper understanding of the mathematics involved.

Available as an ebook exclusively from Bloomsbury.com, Reeds Channel Almanac is provided in Web PDF format for viewing on all compatible devices (including tablets, laptop and desktop computers). PLEASE NOTE: this ebook is NOT compatible with Amazon Kindle devices. The Reeds Channel Almanac covers the south coast of England from the Scilly Isles to Dover, the Channel Islands and northern France from Calais to L'Aberildut, offering cruising and racing yachtsmen ready access to essential navigation information by virtue of its clear layout and user friendly format. Completely updated for 2017, topics include seamanship, pilotage, tide tables, safety procedures, navigation tips, radio, lights, waypoints, weather forecast information, communications, Mayday and distress procedures - in fact everything the cruising yachtsman needs to know. The spiral binding allows the Almanac to be opened flat on the chart table and the large type size and clear layout makes information easy to read even in adverse conditions. This handy volume is ideal for anyone cruising the length of the English Channel. The ebook incorporates the free Reeds Marina Guide. Also available: free supplements of up-to-date navigation changes from January to June at: www.reedsnauticalalmanac.co.uk 'There are some things I would not go to sea without - Reeds is one of them.' Sir Chay Blyth

Includes all works deriving from DOE, other related government-sponsored information and foreign nonnuclear information.
