The "Red Book" presents a background to conventional foundation analysis and design. The text is not intended to replace the much more comprehensive 'standard' textbooks, but rather to support and augment these in a few important areas, supplying methods applicable to practical cases handled daily by practising engineers and providing the basic soil mechanics background to those methods. It concentrates on the static design for stationary foundation conditions. Although the topic is far from exhaustively treated, it does intend to present most of the basic material needed for a practising engineer involved in routine geotechnical design, as well as provide the tools for an engineering student to approach and solve common geotechnical design problems.

#1 NEW YORK TIMES BESTSELLER • “ Prepare to be entranced by this addictively readable oral history of the great war between humans and zombies. ” —Entertainment Weekly We survived the zombie apocalypse, but how many of us are still haunted by that terrible time? We have (temporarily?) defeated the living dead, but at what cost? Told in the haunting and riveting voices of the men and women who witnessed the horror firsthand, *World War Z* is the only record of the pandemic. The *Zombie War* came unthinkably close to eradicating humanity. Max Brooks, driven by the urgency of preserving the acid-etched first-hand experiences of the survivors, traveled across the United States of America and throughout the world, from decimated cities that once teemed with upwards of thirty million souls to the most remote and inhospitable areas of the planet. He recorded the testimony of men, women, and sometimes children who came face-to-face with the living, or at least the undead, hell of that dreadful time. *World War Z* is the result. Never before

This treatise discusses Ackley Improved cartridges. We will not teach you how to install and chamber a barrel here, we handle that information in, "Chambering Rifle Barrels for Accuracy". In this book we will in detail help you to understand the special details related to chambering for Ackley Improved designs. P.O. Ackley is the undisputed King of Improved cartridges and maybe of wildcats in general. He was active in gunsmithing from 1936 until his passing in 1989. Ackley was probably not the originator of fireformed "improved" cartridge designs, but he was definitely the guy who popularized it, and more importantly P.O. Ackley standardized the improved cartridge concept. What I mean by that is that he created a simple understandable headspace method for these designs. You will learn how to apply these simple principals.
