Special Features: · Widely acknowledged to be the most complete and authoritative survey text in Physics. Most mathematically complete and challenging text available. Entire book edited to clarify conceptual development in light of recent findings of physics education research. Following the inspiration of Arnold Arons, the Mechanics sequence is re-organized so that energy is the capstone topic. End-of-chapter problem sets are thoroughly over-hauled - new problems are added, outdated references are deleted, and new short-answer conceptual questions are added. The presentation of Thermodynamics and Quantum Mechanics has been revised to provide a more modern approach to these topics. The supplement package for both students and instructors has been greatly expanded. For students there are a Student Study Guide,

There has been increasing interest in including a significant treatment of modern physics in the introductory physics course. In response to this trend the authors have prepared an extended version of Physics, Part II. They have modified the last two chapters, Light and Quantum Physics, and the Wave Nature of Matter, and added five new ones, namely, The Structure of Atoms; Atomic Physics: Three Selected Topics; Electrical Conduction in Solids; Nuclear Physics - An
