The first version of this book, Packaging Materials and Containers was published in 1967 and was revised extensively ten years later under the title The Packaging Media. Some thirty or so authors were involved in producing the initial texts for these books, and I must acknowledge their material, much of which is still valid. It is now thirteen years since The Packaging Media-high time to take stock and incorporate the considerable advances in materials, forms, techniques and machinery that have taken place. In 1977, wherever possible, we asked the original authors to carry out the revisions, but retirements and job changes have now eliminated over twenty of the original authors. We have therefore appointed an Editorial Board to advise on this more extensive revision, and I wish to thank them for their detailed and helpful assistance: Dr C. J. Mackson and Professor Y. Dagel for general comments and guidance on the overall plan and, in particular, the Introduction (chapter 1); Graham Gordon and Harri Mostyn for assistance with much of Part D on Distribution Packages, and Dennis Hine and Susan Selke for their work in respect of paperboard and plastics retail packaging, respectively. A major contribution was made by the seventh member of the Editorial Board, David Osborne, who advised in the area of glass.

The Sears List of Subject Headings, an outstanding name amongst subject headings lists, is used all over the world in small and medium sized libraries. It has constantly been revised and kept up to date, both in its methods and contents, by incorporating new subjects and updated organizational machinery. Being handy, simple, inexpensive and always current, the Sears List is a convenient choice for teaching subject headings work in library schools. User ' s Guide to Sears List of Subject Headings, 2nd Edition is a companion book which, although based on the 222nd edition of the Sears List, should also be useful to the libraries using some previous edition. It attempts to explain the theoretical foundations, history and application of the Sears List as well as of the subject headings work in general. It explicates the various hidden potentials of the system to construct subject headings needed for local situations. The object of this small, practical introduction is to be simple, clear and illustrative. The book assumes no prior knowledge either of the Sears List or of subject headings work in general. It is a manual for beginners to understand the importance of vocabulary control, the process of subject analysis, the structure and organization of the Sears List, and the methods to locate, specify and construct subject headings and provide cross references for the public catalogue. Subject headings in the complex areas of languages, literatures, biographical and geographical works are given a chapter each. Review questions and exercises conclude most chapters. A bibliography and glossary are valuable features of this work
