Evolution Man was first published in 1960, written by Roy Lewis. It is a story of a small tribe of cavemen slowly making progress in the world as they develop and learn to use tool, make fire and weapons. Of course, this probably did not happen as quickly as it does in the narrative, but that is all part of the charm of the book.

The Evolution Man: Or, How I Ate My Father by Roy Lewis

Human evolution, the process by which human beings developed on Earth from now-extinct primates. The only extant members of the human tribe, Hominini, belong to the species Homo sapiens. The exact nature of the evolutionary relationships between modern humans and their ancestors remains the subject of debate.

human evolution | Stages & Timeline | Britannica

the genus Homo. The evidence for the evolution of man is more than fossils and missing links. There is an amazing pattern to the fossils that have been found, and I hope to bring that out in this section. From the human evolution timeline we can pull an amazing lineage. The Evolution of Man Human evolution is the Page 7/15

The Evolution Man Or How I Ate My Father Roy Lewis

Humans began to evolve about seven million years ago, and progressed through four stages of evolution. Research shows that the first modern humans appeared 200,000 years ago. Neanderthals were a separate species from humans. Although they had larger brain capacity and interbred with humans, they eventually died out.

The Evolution of Humans | World Civilization

The Evolution Man follows the struggle of a small tribe of cavemen in northern Africa as they try to keep one step ahead of Mother Nature.

Roy Lewis's "The Evolution Man, or How I Ate My Father ...

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus Homo—and leading to the emergence of Homo sapiens as a distinct species of the hominid family, which includes the great apes. This process involved the gradual development of traits such as human bipedalism and language ...

Human evolution - Wikipedia

The timeline of human evolution outlines the major events in the evolutionary lineage of the modern human species, Homo sapiens, throughout the history of life, beginning some 4.2 billion years ago down to recent evolution within H. sapiens during and since the Last Glacial Period.. It includes brief explanations of the various taxonomic ranks in the human lineage.

Timeline of human evolution - Wikipedia

The evolution of man. Our three million year journey from the treetops of Africa to civilisation. Mother of man. One fossil discovery has transformed views of how we became human. But why is Lucy ...

BBC - Science & Nature - The evolution of man

Human evolution is the lengthy process of change by which people originated from apelike ancestors. Scientific evidence shows that the physical and behavioral traits shared by all people originated from apelike ancestors and evolved over a period of approximately six million years. One of the earliest defining human traits, bipedalism -- the ability to walk on two legs -- evolved over 4 million years ago.

Introduction to Human Evolution | The Smithsonian ...

The modern theory concerning the evolution of man proposes that humans and apes derive from an apelike ancestor that lived on earth a few million years ago. The theory states that man, through a combination of environmental and genetic factors, emerged as a species to produce the variety of ethnicities seen today, while modern apes evolved on a separate evolutionary pathway.

Evolution Of Man - AllAboutScience.org

The first person who explained how evolution happens was Charles Darwin with his scientific theory of natural selection. Charles Darwin observed that although individuals in a species shared...
