Women in History. From great medieval queens to nurses in the First World War, the role of women throughout English history has often been overlooked. Here we highlight some of their stories – not only the women who achieved high status and success, but also those who remain largely unnamed in history, and who have quietly shaped our way of life today.

The move for women to have the vote had really started in 1897 when Millicent Fawcett founded the National Union of Women's Suffrage. "Suffrage" means the right to vote and that is what women wanted – hence its inclusion in Fawcett's title. Millicent Fawcett believed in peaceful protest. She felt that any violence or trouble would persuade men that women could not be trusted to have the right to vote.

In the 1850s, women's skirts were domed and bell-shaped, supported by crinoline petticoats. They often featured deep flounces or tiers. Long bloomers and pantaloons trimmed with lace were popular. Tiered cape-jackets were fashionable, as were paisley patterned shawls. Deep bonnets were worn and hair was swept into buns or side coils from a centre parting.

This volume charts the rise of professional women writers across diverse fields of intellectual enquiry and through different modes of writing in the period immediately before and during the reign of Queen Victoria. It demonstrates how, between 1830 and 1880, the woman writer became an agent of cultural formation and contestation, appealing to and enabling the growth of female readership while issuing a challenge to the authority of male writers

and critics. Of especial importance were changing definitions of marriage, family and nation, of class, and of morality as well as new conceptions of sexuality and gender, and of sympathy and sensation. The result is a richly textured account of a radical and complex process of feminization whereby formal innovations in the different modes of writing by women became central to the aesthetic, social, and political formation of British culture and society in the nineteenth century.

During the seventeenth century, in response to political and social upheavals such as the English Civil Wars, women produced writings in both manuscript and print. This volume represents recent scholarship that has uncovered new texts as well as introduced new paradigms to further our understanding of women's literary history

during this period.

In this study of British middle-class feminism in the late nineteenth and early twentieth centuries, Antoinette Burton explores an important but neglected historical dimension of the relationship between feminism and imperialism. Demonstrating how feminists in the United Kingdom appropriated imperialistic ideology and rhetoric to justify their own right to equality, she reveals a variety of feminisms grounded in notions of moral and racial superiority. According to Burton, Victorian and Edwardian feminists such as Josephine Butler, Millicent Garrett Fawcett, and Mary Carpenter believed that the native women of colonial India constituted a special 'white woman's burden.' Although there were a number of prominent Indian women in Britain as well as in India working

toward some of the same goals of equality, British feminists relied on images of an enslaved and primitive 'Oriental womanhood' in need of liberation at the hands of their emancipated British 'sisters.' Burton argues that this unquestioning acceptance of Britain's imperial status and of Anglo-Saxon racial superiority created a set of imperial feminist ideologies, the legacy of which must be recognized and understood by contemporary feminists.

Until recently, history writing has been understood as a male enclave from which women were restricted, particularly prior to the nineteenth century. The first book to look at British women writers and their contributions to historiography during the long eighteenth century, *British Women Writers and the Writing of History, 1670-1820*, asks why, rather than writing history that included their own sex, some women of this period chose to write the same kind of history as men—one that marginalized or excluded women altogether. But as Devoney Looser demonstrates, although British women's historically informed writings were not necessarily feminist or even female-focused, they were intimately involved in debates over and conversations about the genre of history. Looser

investigates the careers of Lucy Hutchinson, Lady Mary Wortley Montagu, Charlotte Lennox, Catharine Macaulay, Hester Lynch Piozzi, and Jane Austen and shows how each of their contributions to historical discourse differed greatly as a result of political, historical, religious, class, and generic affiliations. Adding their contributions to accounts of early modern writing refutes the assumption that historiography was an exclusive men's club and that fiction was the only prose genre open to women.

A constellation of new essays on authorship, politics and history, *British Women's Writing in the Long Eighteenth Century: Authorship, Politics and History* presents the latest thinking about the debates raised by scholarship on gender and women's writing in the long eighteenth century. The essays highlight the ways in which

played a direct and important role in broadening the horizons of women. Also included are women who influenced events in a more indirect way: the wives of kings and politicians, mistresses, ladies in waiting and society hostesses. Originally published as The Europa Biographical Dictionary of British Women, this newly re-worked edition includes key figures who have died in the last 20 years, such as The Queen Mother, Baroness Ryder of Warsaw, Elizabeth Jennings and Christina Foyle.
