Just about everyone who came of age during the 1960s, 70s, and 80s was influenced by MAD MAGAZINE, and no one at MAD was more influential than "MAD's MADdest Artist," Don Martin. His immediately recognizable style--featuring bulbous noses, wild sound effects, and the legendary "hinged feet"--was filled with broad and daring slapstick and routinely broke new ground. A surprisingly quiet man, Martin's work spoke volumes as he left an indelible mark on several generations, influencing the style of many illustrators while shaping the sense of humor of countless misguided youths. He was inducted into the Comic Book Hall of Fame in 2004. Says Gary Larson, creator of The Far Side: "Don Martin was the one who really stood out."Now, it is with great pride that Running Press, in collaboration with MAD, launches the MAD's Greatest Artists: The Completely MAD Don Martin (MAD's Greatest Artists Series). For the first time ever, here is the complete collection of every piece of art Don Martin published in MAD throughout his extraordinary thirty-year tenure (1957-1987). With all of Martin's strips, covers, posters, and stickers--presented in chronological order--it is nothing less than a masterpiece of comic genius. Complementing Martin's opus of published works are letters, sketches, and rare photos providing an in-depth look at the artist at work. Plus, scattered throughout are notes and original illustrations--commissioned for this volume--paying tribute to the artist and penned by MAD's most-notable personalities, including Al Jaffee, Mort Drucker, Jack Davis, Sergio Aragóns, and more. There are also notes by the likes of Jim Davis (Garfield) and a foreword by Gary Larson. A collector's item and object d'art in its own right, this deluxe two-volume slipcased edition will be the season's must-have gift book for the millions whose childhoods--and subsequent adulthoods--would not have been the same without MAD MAGAZINE and Don Martin.

Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Buy Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence.
