Quick Look. Many popular ideas suggests that life creatures, including human beings, are driven by their selfish DNA

## Colin Tudge - Why Genes Are Not Selfish and People Are ...

Tudge is under the illusion that the claims of Richard Dawkins et al that genes appear to be essentially competitive means that we as humans must be engaging in a struggle every second of every day and that it is a great thing to be selfish. They say nothing of the sort and their theories can easily account for the existence of altruism.

mixing of alleles in the gene pool. This may occur through several mechanisms, including mate selection and partial geographic isolation.

## Selfish Gene Theory Of Evolution Called Fatally Flawed ...

"In summary, the rhetoric of The Selfish Gene exactly reverses the real situation: through [the use of] metaphor genes are endowed with properties only sentient beings can possess, such as selfishness, while sentient beings are stripped of these properties and called machines...The anthropomorphism of genes...obscures the deepest mystery in the life sciences: the origin and nature of mind."

## The Selfish Gene - Wikipedia

The first reason for this is that some selfish genetic elements rapidly sweep to fixation, and the phenotypic effects will therefore not be segregating in the population. Hybridization events, however, will produce offspring with and without the selfish genetic elements and so reveal their presence.
