In this fascinating book, Jenny Houssart draws on close observations with children in lower mathematics sets in primary schools to investigate why some children opt out of mathematics at an early age. After introducing us to the children, she addresses a particular type of mathematical task in each chapter, including: mental work practical work written work calculators and computers assessment tasks. Through the use of stories and quotes, the author shows how the children respond to specific tasks and presents evidence of a range of difficulties that emerge as the children are working. Each chapter ends with discussions and implications for classroom practice. Low Attainers in Primary Mathematics will be a useful resource for primary teachers, student teachers, SENCOs and teaching assistants who will all recognise these children from their own classrooms and draw insights from this highly readable book.

Assessing the effects of New Labour's education policies on primary schools, this book discusses the impact of policies on primary school practices, as well as looking at the views and experiences of primary school teachers and pupils.

This research-based book offers practical guidance on how to go about performance management. Based on experience of working with schools and running courses, and using the latest research on business strategies appropriate for education, it: o looks at what performance management means in practice o offers advice on how to go about monitoring o explains how to use data from pupil assessments o suggests ways to judge the effectiveness of teaching through analysing children's work o gives guidance on monitoring planning, assessment and observing lessons o proposes how to 1853467693reas for development, set objectives and draw up action plans o contains useful photocopiable formats o uses case study material to illustrate potential problems and good practice Throughout, the purpose is to help schools and teachers to be more effective.

The ORACLE (Observation and Classroom Learning and Evaluation) and its follow-up study address the following questions: Has teaching in the primary school changed over the past twenty years? Has pupil performance improved or declined? Are the links between certain teacher approaches and pupil achievement still the same? Has the National Curriculum had any important consequences for the way in which transfer is conducted? One of the main claims of the National Curriculum is that it has provided greater continuity through the various stages and this should be reflected in smoother transition from one school to the next. This book focuses on the issue of transfer from the primary to the secondary school, using data from the ORACLE project. This study which took place from 1975 to 1980, followed by 'Son of ORACLE', the study of group-work in the primary classroom 1980 to 1983, has had an enormous influence on the debate on primary education. The studies described in detail what took place in primary classrooms, the teaching styles used by teachers and the responses made by pupils. It linked these processes to pupil performance. Finally, it followed the pupils as they transferred out of the primary school into the secondary phase of education. At present a new research project is being carried out in Leicester. It involves studying primary schools for one year and then following the children as they transfer to the secondary phase or to a middle school. The project involves two thirds of the schools used in the original ORACLE research. In addition, the same observation instruments and the same tests, modified for cultural differences, are being used.

This textbook, designed to meet the needs of students on the teaching assistant foundation degree, provides an accessible overview of the teaching assistant's role, incorporating practical tasks that will challenge students to reflect on and improve their day-to-day practice. Set within a wider educational context, and full of thoroughly grounded advice throughout, this book includes: personal professional development - helping teaching assistants to understand their role and their workplace growth, development and learning - introducing the basic theories human development and learning behaviour management - exploring strategies that encourage and support appropriate behaviour today's curriculum and how children learn literacy, maths, science and technology understanding inclusive education, exploring access, participation and additional needs for specific groups of young people. With activities, task lists, discussion points, ideas, summary points and notes on further reading, this textbook will be the essential companion for all foundation degree students, as well as a useful handbook for teaching assistants in practice.

These two books contain a variety of assessment resources with material divided into units which correspond to the QCA Scheme of Work for Key Stage 2. This straightforward approach to Science assessment, test practice and revision saves you time with your assessment planning and enables you to accurately monitor your pupils' level of knowledge. Integrates well with the rest of the Primary Science Kit but can also be used independently.

Key Issues for Primary Schools is a concise comprehensive guide to the main issues in primary education and the implications for schools. Presented in a convenient A-Z format, the book includes coverage of: \* special educational needs \* attendance, truancy and exclusion \* bullying and behavioural problems \* management and administration \* safety and security. There is also a review of up-to-date DfEE requirements and suggestions for further action and reading. The addresses of useful contacts help to make it a reference book no primary school should be without.

Winner of the UKLA Author Award 2009:UKLA Lockwood has written a useful, supportive book which will help teachers and librarians...He describes the background and summarises the research and then proposes thoroughly practical programmes' - Carousel 'Michael Lockwood has produced an excellent, practical overview and analysis of what works in the primary school to promote reading for pleasure...Lockwood's work is grounded and valuable to those who need it most - teachers in the classroom working hard to engender a love of reading' - English Drama Media This book is first class. It puts the matter very clearly and succinctly, and presents a great deal of evidence to support the argument that pleasure is not a frivolous extra, but the very heart and essence of what reading is about. It also gives readers plenty of ideas for carrying the principle into the classroom, and for justifying it...This is an excellent piece of work, which I hope will find a place on every staffroom bookshelf.' - Philip Pullman English primary school children are less likely to read for pleasure than their counterparts in many other countries. This practical and focused book discusses the background to this situation and looks at how government initiatives have tried to address it. Drawing on the author's own research project in order to identify good practice in promoting reading for enjoyment, the book presents specific activities which teachers can use to develop their own whole school and classroom practice, enabling them to put the fun back into reading. Each chapter features case-study material and provides examples of planning from schools that have successfully created thriving reading cultures through schemes such as reading assemblies, book clubs, library loyalty cards, school book evenings and quizzes. There is also an extensive, annotated list of print and internet-based resources. Topics covered include: - Becoming a reading for pleasure school - Promoting a love of reading in the early years - Developing reading enjoyment in the later primary years - Getting boys reading Promoting Reading for Pleasure in the Primary School is written for all those involved in education who would like to see as many children as possible develop a love of reading. It will be particularly relevant for primary teachers, teaching assistants, trainee teachers, advisers and consultants, as well as teacher educators and researchers.
